Professional Summary

Machine Learning and Artificial Intelligence student with a strong foundation in Python, C++, Java, Object-Oriented Programming, and Data Structures, currently deepening expertise in Machine Learning and Natural Language Processing through the Microsoft Machine Learning Engineer and Artificial Intelligence and Machine Learning training programs. Strong problem-solving and analytical skills, with hands-on project experience in system design and algorithmic thinking. Eager to apply and grow Machine Learning and Large Language Model related skills in a fast-paced, remote engineering environment.

Education

Bachelor of Computer Science and Artificial Intelligence
University of Sadat City

2024 – 2028

Courses & Training

Microsoft Machine Learning Engineer — Digital Egypt Pioneers Initiative 07/2026 – Present
Training in Machine Learning and Artificial Intelligence with a focus on developing practical machine learning engineering skills.

Artificial Intelligence and Machine Learning Program-Sprints & Microsoft 06/2026 – Present
Training in Artificial Intelligence and Machine Learning fundamentals with hands-on practice.

Web Development Fundamentals-Elzero Web School 01/2026 – 03/2026
Covered HTML, CSS, JavaScript, and PHP fundamentals.

Competitive Programming Contest Training Course, Level 1 Phase-USC Community 02/2025 – 08/2025
Training in algorithms, data structures, and competitive programming.

Competitive Programming Contest Training Course, Newcomers Phase-USC Community 11/2025 – 06/2025
Covered programming fundamentals, algorithms, and problem-solving.

Projects

Water Level Indicator Model
Designed and simulated a water level monitoring system using BC547 transistors, LEDs, resistors, and a buzzer. Performed circuit design, component integration, and testing.

Restaurant Database Management System
Developed a Microsoft Access database to organize restaurant operations and efficiently manage records.

E-Commerce Website User Interface and User Experience Design
Designed a user-friendly interface and experience for a clothing e-commerce website, focusing on intuitive navigation, product presentation, and responsive layouts.

E-commerce Website
Developed a responsive e-commerce website for a clothing store, featuring product browsing, user authentication, shopping cart, and order management using HTML, CSS, JavaScript, PHP, and MySQL.

Object-Oriented Game in C++

Developed a multi-level game using Object-Oriented Programming principles, featuring player and enemy classes with unique powers, dynamic level progression, and win/lose conditions.

Technical Skills

Programming Languages

Python, C++, Java

Machine Learning & AI

Machine Learning, Neural Networks, Natural Language Processing, Large Language Models, Pattern Recognition, Predictive Modeling

Machine Learning Frameworks & Tools

PyTorch, TensorFlow, Hugging Face, Scikit-learn, NumPy, Pandas

Core Concepts

Object-Oriented Programming, Data Structures, Algorithms, Problem Solving, Statistics

Other Skills

Git and Version Control, Databases, Web Development Fundamentals

Languages

Arabic

Native

English

B1
